METERED DARK FIBRE USE CASE

Migrating a Route with Metered Dark Fibre

Migrating from an existing route using Crosslake Fibre's Metered Dark Fibre service can provide material costs savings and increased flexibility for a seamless migration.

CHALLENGE

Network migrations present challenges including cost duplication, high capital expenditure, and operational complexities. Traditional methods demand mirroring routes and large hardware purchases, requiring substantial upfront investment and long-term commitments.

SOLUTION

Crosslake Fibre introduces an innovative solution to migration challenges with Metered Dark Fibre (MDF). This unique approach enables organizations to mitigate typical costs and resource strains of network migrations. It provides significant cost savings, enhanced flexibility, and allows for a controlled migration pace. This facilitates a smoother, more efficient network migration process, tailored to the organization's evolving needs and timeline.
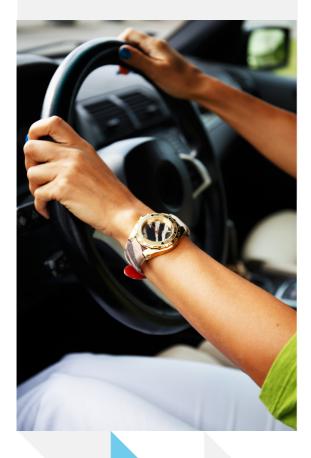

CHALLENGES

- Migrations require cost duplication.
- Expenditure, complexities rise.
- Mirrored routes, and duplicate hardware needed.
- Upfront investment, commitments hefty.

BENEFITS

- Reduces duplicate costs.
- Regulates migration pace.
- Enables gradual migration.
- Facilitates endpoint modification.

BENEFITS

Eliminate Cost Duplication:
Our Metered Dark Fibre solution negates the need for a long-term commitment and excessive costs often associated with network migrations, significantly reducing financial pressure.

Control Your Pace:
Leveraging the ability to migrate at your own preferred pace, you are empowered to handle your network transition in a controlled and efficient manner. This mitigates the risk of substantial fixed cost duplication, ensuring a cost-effective and stress-free migration process.

Migrate Card by Card:
Crosslake Fibre's solution allows for card-by-card migration, eliminating the necessity to purchase a large amount of hardware solely for the transition, thus streamlining the process and reducing capital costs.

Flexibility to Change Endpoints:
Our Metered Dark Fibre offering provides the agility to modify endpoints without the burden of duplicating fixed costs or incurring hefty capital expenditure, ensuring you have the flexibility to manage your network as per evolving business requirements.

Scalability for Growth:
Our Metered Dark Fibre solution is designed to grow with your business. As your organization expands, you can easily scale up your network capacity to meet increased demands, providing a future-proof solution that accommodates your evolving business needs without imposing significant extra costs.
