

METERED DARK FIBRE USE CASE

Restore and Protect with Metered Dark Fibre

Network availability and performance are vital to mission critical operations. Crosslake Fibre's Metered Dark Fibre solution enables redundancy and restoration, protecting your reputation and finances.

CHALLENGE

Outages can impact customer retention, and not meeting SLAs can reduce revenues and strain teams. Without a protection path or restoration plan, companies can damage their reputation and incur higher costs when their network isn't available. High network availability requires redundancy, but redundant network paths are expensive to implement and maintain.

SOLUTION

Crosslake Fibre's innovative Metered Dark Fibre solution revolutionizes network protection and restoration while increasing network availability and guarantees minimal impact from network outages. By capitalizing on MDF, companies not only achieve optimal network redundancy and superior network availability but also bypass the substantial expenses typical of traditional redundant paths.

AT A GLANCE

CHALLENGES

- Outages cause reputational damage.
- Implementing redundancy is expensive.
- SLA breaches impact revenue negatively.
- Network downtime taxes operations and increases costs.

BENEFITS

- Most affordable method of implementing redundancy.
- Protection and restoration retains customers.
- Exceeding SLAs retains revenue.
- Protect customer trust with high availability.

BENEFITS

Cost Effective

Crosslake Fibre's Metered Dark Fibre solution provides a revolutionary method of achieving redundancy on long-haul dark fibre routes. MDF offers substantial cost savings while dramatically reducing expenses compared to the traditional approach of buying multiple routes.

Maintain SLAs

With Metered Dark Fibre, companies can confidently ensure high network availability, fostering trust and reliability. By minimizing or eliminating downtime, MDF users ensure they exceed customer SLA, solidifying customer loyalty and bolstering business reputation.

Rapid Recovery

With Crosslake Fibre's Metered Dark Fibre solution, businesses can ensure continuous service during an outage on a network path boosting customer trust, and effectively retaining more clients.

Protect Reputation

With an active protection path in place, businesses can safeguard against unforeseen network challenges, ensuring customer trust remains intact. It's pivotal to prioritize robust solutions to prevent potential reputation damage.

Efficient Redundancy

By leveraging Crosslake Fibre's innovative Metered Dark Fibre solution, businesses can seamlessly achieve essential network redundancy, ensuring optimal performance while significantly cutting down associated expenses compared to traditional methods of achieving redundancy.
